

## A Memory construction

### Committed events

daily buffer of the open day

day ends

### Trajectory extraction

✓ source check vs. cited events

7 daily records

### Regularity proposal

✓ historical replay gate

## ProactMem memory

### Event memory

$S_t$

last 72 h,  $\leq 99$  events

### Temporal trajectories

$W_t$

source-checked

### Behavioral regularities

$L_t$

active vs. candidate

## B Event-driven decision

online, per event

### Context $C_t$

$S_t$  recent events

$Q_t$  episode state

$W_t$  trajectories

$e_t$  current event

$R_t$  regularities

### Retrieval

top 3 by  $e_t$

current event  $e_t$

### Decision LLM

service value?

### Intervention control
