Recent events (72 h)

Decisions today

Missed opportunity

Generic-memory agent

Retrieves similar notes, unchecked

Walks in the evening

Walked 5 km (Tue) *unsupported*

Goes running at 07:10 *one-off*

→ advice whenever activity is low

Decisions today

Two false interventions

Agent with ProactMem

Checks history before it reaches the decision

① Daily trajectories

source check

Mon ✓ Tue ✓ Thu ✓ ~~Tue: walked 5 km ✗~~

② Temporal patterns

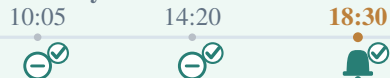

replay support

Evening walk, 18:00–19:00 **Active** (3/3 days)

Morning run, 07:00–08:00 *Candidate* (1 day)

③ **Applies now:** 18:30 in window; no walk yet

Decisions today

Timely “Up for a short walk?” no false alarms
